PROFESSIONAL SUMMARY

Second-year engineering student specializing in digital engineering and artificial intelligence applied to healthcare. Two complementary 2026 internships: independently designed and deployed a multi-agent AI system on Azure at Smartovate Ltd (London, remote), and worked in physico-chemical quality control at Promopharm S.A. — Hikma Pharmaceuticals group. Proficient in Python, C++ and core AI concepts, with hands-on practice in Microsoft Azure, automated testing and regulated environments (GMP, ICH, ALCOA+). I aim to contribute to high-impact innovation in digital health.

EDUCATION

SUPTECH-SANTÉ, Mohammedia
Engineering Cycle — Digital Engineering & AI in Healthcare 2025 – 2028
Integrated Preparatory Classes 2023 – 2025

Lycée Alexandre, Casablanca
Baccalaureate in Physical Sciences & Chemistry — Highest Honors 2022 – 2023

PROFESSIONAL EXPERIENCE

Intern — AI & Cloud Engineering 1 Jul. – 31 Aug. 2026 (2 months)
Smartovate Ltd — London, United Kingdom (remote) github.com/HaithamSD01/smartovate-multiagent

- Independently designed, built and deployed a multi-agent system (Microsoft AutoGen v0.4+, Azure OpenAI GPT-4o): four-agent hub-and-spoke topology with dynamic speaker selection and dual termination conditions, exposed through an authenticated REST API.
- Shipped to production on Azure Container Apps: 7 Azure resources provisioned, 11 application secrets injected via *secretRef* (no sensitive value in plain text), logging through Log Analytics.
- Raised unit-test coverage from 38% to 100% (63 tests, 269 lines), with the measurement scope pinned in a versioned *.coveragerc* for reproducibility — contractual target: 80%.
- Median production latency measured at 47.3 s via an automated benchmark harness (required threshold: < 60 s); 15/15 successful end-to-end runs.
- Designed a dependency-inversion architecture that absorbed Microsoft's mid-project retirement of Azure Cache for Redis, migrating to Azure Managed Redis with no change to application code.
- Ran the project Agile across four 2-week sprints (Jira, 29 tickets): 18/18 backlog tasks and 7/7 deliverables completed, every sprint closed ahead of schedule.

Intern — Physico-chemical Quality Control 13 Jul. – 13 Aug. 2026 (1 month)
Promopharm S.A. (Hikma Pharmaceuticals group) — Had Soualem, Morocco

- Rotated across raw materials, finished products, stability and chromatography stations: HPLC, GC, TLC, UV-Vis spectrophotometry, Karl Fischer titration, dissolution testing, pH and conductivity measurement.
- Ran a full case study of the HPLC assay of a finished product, from sample preparation to chromatogram interpretation (system suitability, degradation products), documented in a 64-page report structured as an industrial audit.
- Detected an appearance non-conformity (foreign particles in an ointment) during visual inspection, complementing instrumental methods.
- Submitted a proposal to the laboratory's improvement-ideas scheme: a digital twin of the lab and an AI-based calculation assistant for automated verification of dilutions and assay results.
- Worked in a regulated environment: GMP, European Pharmacopoeia, ICH Q1A(R2), ALCOA+ data integrity, out-of-specification/out-of-trend handling (OOS/OOT), NF ISO 2859-1 sampling.

SKILLS

Programming & development: Python, C, C++, SQL, FastAPI, Streamlit, Git/GitHub, Arduino IDE, MATLAB, SolidWorks
AI & data: Machine Learning, multi-agent systems (Microsoft AutoGen), Azure OpenAI (GPT-4o), data preprocessing, model training & evaluation
Cloud & DevOps: Microsoft Azure (Container Apps, Container Registry, Cosmos DB, Managed Redis, Log Analytics), Docker, pytest / pytest-cov, Jira, Agile
Quality & regulatory (healthcare): GMP, European Pharmacopoeia, ICH Q1A(R2), ALCOA+, HPLC, GC, UV-Vis spectrophotometry, Karl Fischer
Soft skills: Communication, Teamwork, Leadership, Public speaking, Organization, Adaptability
Languages: Arabic (native), French, English | **Interests:** Travel, Swimming, Chess, Photography

TECHNICAL PROJECTS

RallyIA Future Lab Hackathon — Merzouga 2026
Won 3rd prize in the e-Government category for designing and pitching an innovative digital-governance solution against competing engineering teams.

Diabetes Prediction Project — Machine Learning
Built and evaluated a supervised machine learning model in Python, managing the full pipeline: data preprocessing, feature engineering, model training and performance assessment.

Intelligent Wristband Project — IoT / Embedded 2024 – 2025
Developed the hardware and embedded software for a smart wristband prototype monitoring vital signs in real time: blood pressure, heart rate and body temperature.

LEADERSHIP, PROGRAMS & VOLUNTEERING

Huawei Seeds for the Future Program — Dongguan & Shenzhen, China 2025
Selected for Huawei's flagship international talent program: 7-day intensive training in 5G networks, Cloud Computing and AI, delivered by Huawei engineers.

AIESEC Mohammedia — Vice President, Outgoing Global Talent (OGT) 2025 – 2026
Directed international talent acquisition and managed a 6-month youth-exchange pipeline, progressing from Member Promoter to Vice President.

Apex Digital — Former President & Treasurer
Led the university's official digital community, overseeing strategic direction, financial management and event programming.

International Marathon Organization — Mohammedia & Hay Hassani 2024 – 2026
Coordinated end-to-end logistics for several editions of an international marathon (children's and adults' races).

Campus Events & Chess Tournaments — SUPTECH-SANTÉ 2024 – 2026
Co-organized university events and inter-class chess tournaments; competed and finished 2nd (2024) and 3rd (2025).

CERTIFICATIONS & TRAINING

CompTIA Security+ training (SY0-701) — Smartovate Ltd / Subul (2026) • Huawei Talent Development Flagship Project (Seeds for the Future) — Huawei (2025) • What is Generative AI? — LinkedIn Learning (2025) • AI for Beginners — HP LIFE / HP Foundation (2025) • AI Basics: Overview of AI — Huawei Talent Online (2024)
